

In the Claims:

No claim is amended herein. Non-elected claims 2 and 3 were previously canceled.

1. (currently amended) A tool suspension device comprising:

a suspension board having a front; and

a tool bracket mounted demountably on the front of the suspension board and having

a U-shaped body having a top, a bottom, two opposite sides, a front free from a parting line, a longitudinal tool slot defined from the top to the bottom and a continuous parting line formed around the top, the bottom and the sides, wherein the parting line is separated from the front; and

a product indicator molded on the front of the U-shaped body.

2. (canceled)

3. (canceled)
